## Splice Xbox Download Code

Download >>> <http://bit.ly/2NFOdJg>

### About This Game

Splice is an experimental and artistic puzzler. Immerse yourself in its microbial world and start splicing! Every level ("strand") consists of a number of cells that you will need to rearrange into a target structure in several moves ("splices"). Exploration and experimentation are key in determining how the curious little cells react to each other. Predict the sequence of splices you'll have to make in order to successfully arrange each strand. Re-sequence, mutate, and splice your way through this unique puzzle experience, and you'll exercise your ability to visualize sequential series of shapes over time. Solve your way to the final strands and you'll be left with a heady sense of mental accomplishment!

Splice is the fourth title out of Cipher Prime Studios, and was the Best Puzzle Game winner of the 2011 Intel Level Up contest.

### Key Features:

- **75+ Puzzles:** The main sequences introduce the player to the game's basic mechanics and the epilogue sequences challenge the player's mastery of the game.
- **Angelic Solutions:** Every level is solved in a few moves. Challenge yourself and find the angelic solutions of puzzles by completing puzzles in fewer splices than you're given. Novice players can still progress through the game by using all splices.
- **Unique Geometry:** Explore the structure of a binary tree in radial space.
- **Absorbing Soundscape:** Put your headphones on and lose yourself in Splice's hauntingly beautiful and Glass-ian piano music.
- **Compelling Colors:** Massage your retinas with the soothing visual effects and ambience of this primordial puzzle

Graphics are Nice, Music is really good, the interface and controls are intuitive. overall it is a nice puzzle game, though some of the later puzzles do ramp up quickly in difficulty.. This is a really fun game for those who like to think and don't expect the answer to be straightforward everytime. I love it!. Splice is a hidden gem among puzzle games.

Every level has the same goal - to place cells into a given pattern in a very little amount of moves. Despite the fact that rules of the game are very simple, one needs to well understand principles of cells' behavior to master the game. Spatial thinking might be helpful there. There is no space to feel repeatability. Two similar-looking levels usually require completely different steps.

Finding a solution in few moves might sound easy at first, but then the difficulty of Splice increases gradually with a progress of the game and in the end it gets quite difficult.

When it comes to the amount of levels, it is okay - completing them all left me with a satisfaction and did not make me tired of playing.

As for the aspects other than gameplay itself, there is a simple yet effective graphics. The way the cells move gives a nice feeling of working in some kind of liquid. The impression is intensified by an ambient lightning and a noise effect. This, plus a wonderful piano soundtrack make the game to be perceived as a calm and relaxing.

Splice is an unique and outstanding game that I highly recommend to everyone.

Even though it is a puzzle game, it is easy to relax with it and enjoy it.. Beatiful and simple graphics.

Seems like a casual puzzle at first, but when you progress, the game gets harder and demands far more attention and skills.

I did'nt nail it by my own, need lots of youtube guides to get the achievements. Thank you Haiaiai channel.. A.K.A. "the history of bacteria" puzzle edition.. In short, this is a fun little waste of time.

In less short...

You won't get a great deal of replayability out of this. Aside from the few "potential angelic" levels (ones where it's possible to solve with less than the allocated splices, which may take redoing that specific level a time or two), and a few sticky ones that can be frustrating, you'll just blitz through in a few hours and shelve it. That said, it's engrossing, and you will easily lose those few hours in one sitting before wondering who fiddled with your clock.

It does have a tendency to dump you in the deep end: there's no tutorial, and new specials are simply dropped on the first strand of each sequence so it can be frustrating simply not knowing the tools to solve it rather than due to the puzzle's difficulty. That's especially true with the first special where you're not told to right-click to activate when you've been drag-dropping before, or when you first get two specials at once and have to intuit that the slightly shinier one will go first regardless of where you click. However, there's a finite number of specials, and only drag-drop and right-click as controls, so it's doable, just would be nicer with a wee pop-up first time to say "hey, do X and Y happens!" to make it a little smoother.

---

The graphics are pretty, and incredibly smooth for what it is. I do also like how uncluttered the screen is so there's nothing to distract from the puzzle at hand. The music and effects sounds, similarly, are non-invasive: nothing spectacular, but they're inoffensive and relaxing - and if I'm honest a little bit hypnotic, which feeds into the "I can't leave my chair until I do just one more strand" aspect of it - without being too elevator-muzak-y. Suits the game perfectly.

Only glitch I've found is that it does not like windowed mode, in fact none of the graphics show up so you just get a background, tinkly music, and bleeps as you click blindly at the ninja-genes. Annoying, but not game-breaking, as long as you, y'know, play in not-windowed mode. To be honest, it's that enthralling that you won't really want to be tabbing out, it really is, despite those few niggles, a one-sitting-playthrough kind of addictive.. Pointless crap with out instructions on how to play!. As mentioned in the other reviews, this game sends data to Google Analytics.

Also it's capped to 30 memes per second.. This game reminds me of Spacechem, only it doesn't feel like homework.

Splice is a game made by the creators of Spacechem. It is an experimental puzzle game where you are given a limited number of "splices" to re-arrange the composition of a cell. You do this to try and match the predetermined shape given to you.

...Yeah, that sounds complicated as hell now that I think about it. But it is a complex game. Each level is a puzzle that needs to be solved. Its an interesting puzzle game, but the presentation is what I think makes the game. The music is great, creating a peaceful and calming atmosphere. The graphics, while simple, are very pretty, with cells moving in an organically smooth way when moved.

Its a small little puzzle game, but I found myself enjoying it much more than I thought I would. Give it a go.

---

Overall, an enjoyable puzzle game. The graphics and overall visual style make it fun to interact with the puzzles and are just visually pleasing to watch. The way the mechanics are slowly introduced prevent it from being too frustrating.

What makes the puzzles especially engaging is how it plays as they become more complex. In some puzzle games, it just becomes an invitation to "brute force" a solution, which is not very fun and tends to be frustratingly boring. In this game, however, the puzzles each seem to have several "insights" that you can discover as you play around, which you can then use to develop a solution. The rewind mechanic makes this discovery process much easier and more pleasant - for example, if you find all of your splices used up but your result is really close to the end goal, you can rewind and keep trying different things to try to "fix" your splices until you get the answer. You can also take the approach of trying to discover useful properties about each puzzle as you experiment with different splices and exploit those properties to devise a solution.

So, not only are there multiple solutions - there's multiple, challenging and rewarding strategies you can take to discover those solutions without using brute force.

One downside is that the music seems to have only one track and is too short and played too often, however, which gets a bit annoying after awhile.

And despite beating the main game in 4 hours, I'm sure you can get a lot of additional play time out of the bonus levels (the "epilogue".. ing brilliant!!! I love this dev!

This is gonna be worth every penny! BUY BUY BUY!!!

Love the BGM, the wobbly effects of the strands, the main menu is a masterpiece and of course, the game itself!!!. Sublime puzzle game with a simple soundtrack. Intensely difficult epilogue.. Discover the world of microbes. Help them splice to find the right form. It's another unique puzzle game with an awesome soundtrack that will help you enjoy some hours.. This puzzler is inventive, fair and doesn't overstay its welcome. It seperates itself from other puzzle games with its unique design and excellent presentation, with a soundtrack that's become a certitude on my mp3.

There are few more perfect puzzlers than this.
